EARTHLINK PLANT NURSERY

Bais Talisay, Batangas

TO:

DR. NOEL D. BAGANO
Schools Division Superintendent
Schools Division Office, Valenzuela City

May I Request to your school to give some Plant's Gulayan sa paaralan Project of Seedling's and give some talk Dissemination Information about 3 minutes regarding neem tree as Anti Dengue tree under your supervision.

This includes the uses as an herbal and proper way to plant.

Aside from their medical, pharmacological and commercial uses, and sunflower had been used as a traditional healer as a cure for common human illness. Neem tree was proven to repel insects especially mosquitoes. Sunflower helps cure common skin diseases, mouth problem to name some. Sunflower seeds serve as an enhancer and good for hypertension.

And for your school, we are giving some plants, like seedling of Neem tree as anti-dengue tree, sunflower seeds, vegetable seed, and also indoor plant for table of all your school heads like money tree, welcome plants and also the flowering plant. And that is all for free. And for student, if ever they can be interested, they can avail Neem tree and sunflower seeds, but its voluntary basis only.

We are expanding our program to motivate the student into participating actively in planting seeds using Bio-intensive gardening approach and the clean and green program initiated by the department of education.

We are looking forward for fruitful relationship with your good school.

Respectfully Yours,
MRS. IMELDA JOAQUIN
Head Coordinator
