The P8C10 Cartridge Cabinet Line Matrix Printer has a print speed of 1000 lines per minute. This enclosed cabinet printer is ideal for office environments where acoustic emissions need to be kept to a minimal level. The cabinet printer's modular design and wide selection of paper handling options make it ideal for noise adverse areas of your company running large unattended print applications.

The ribbons for this printer are backwards compatible to the P7000 Cartridge Series allowing use of the same ribbons in your older printers. This will help to reduce inventory management costs.

Remote printer diagnostics will let you monitor the printer status, plus remotely configure settings and firmware. This could be a cost saving convenience if you have more than one location, or you have printers spaced throughout your location. It allows one technician to manage a large number of printers from one location.
